Copilot Agents

Agents

AI

Search

Security

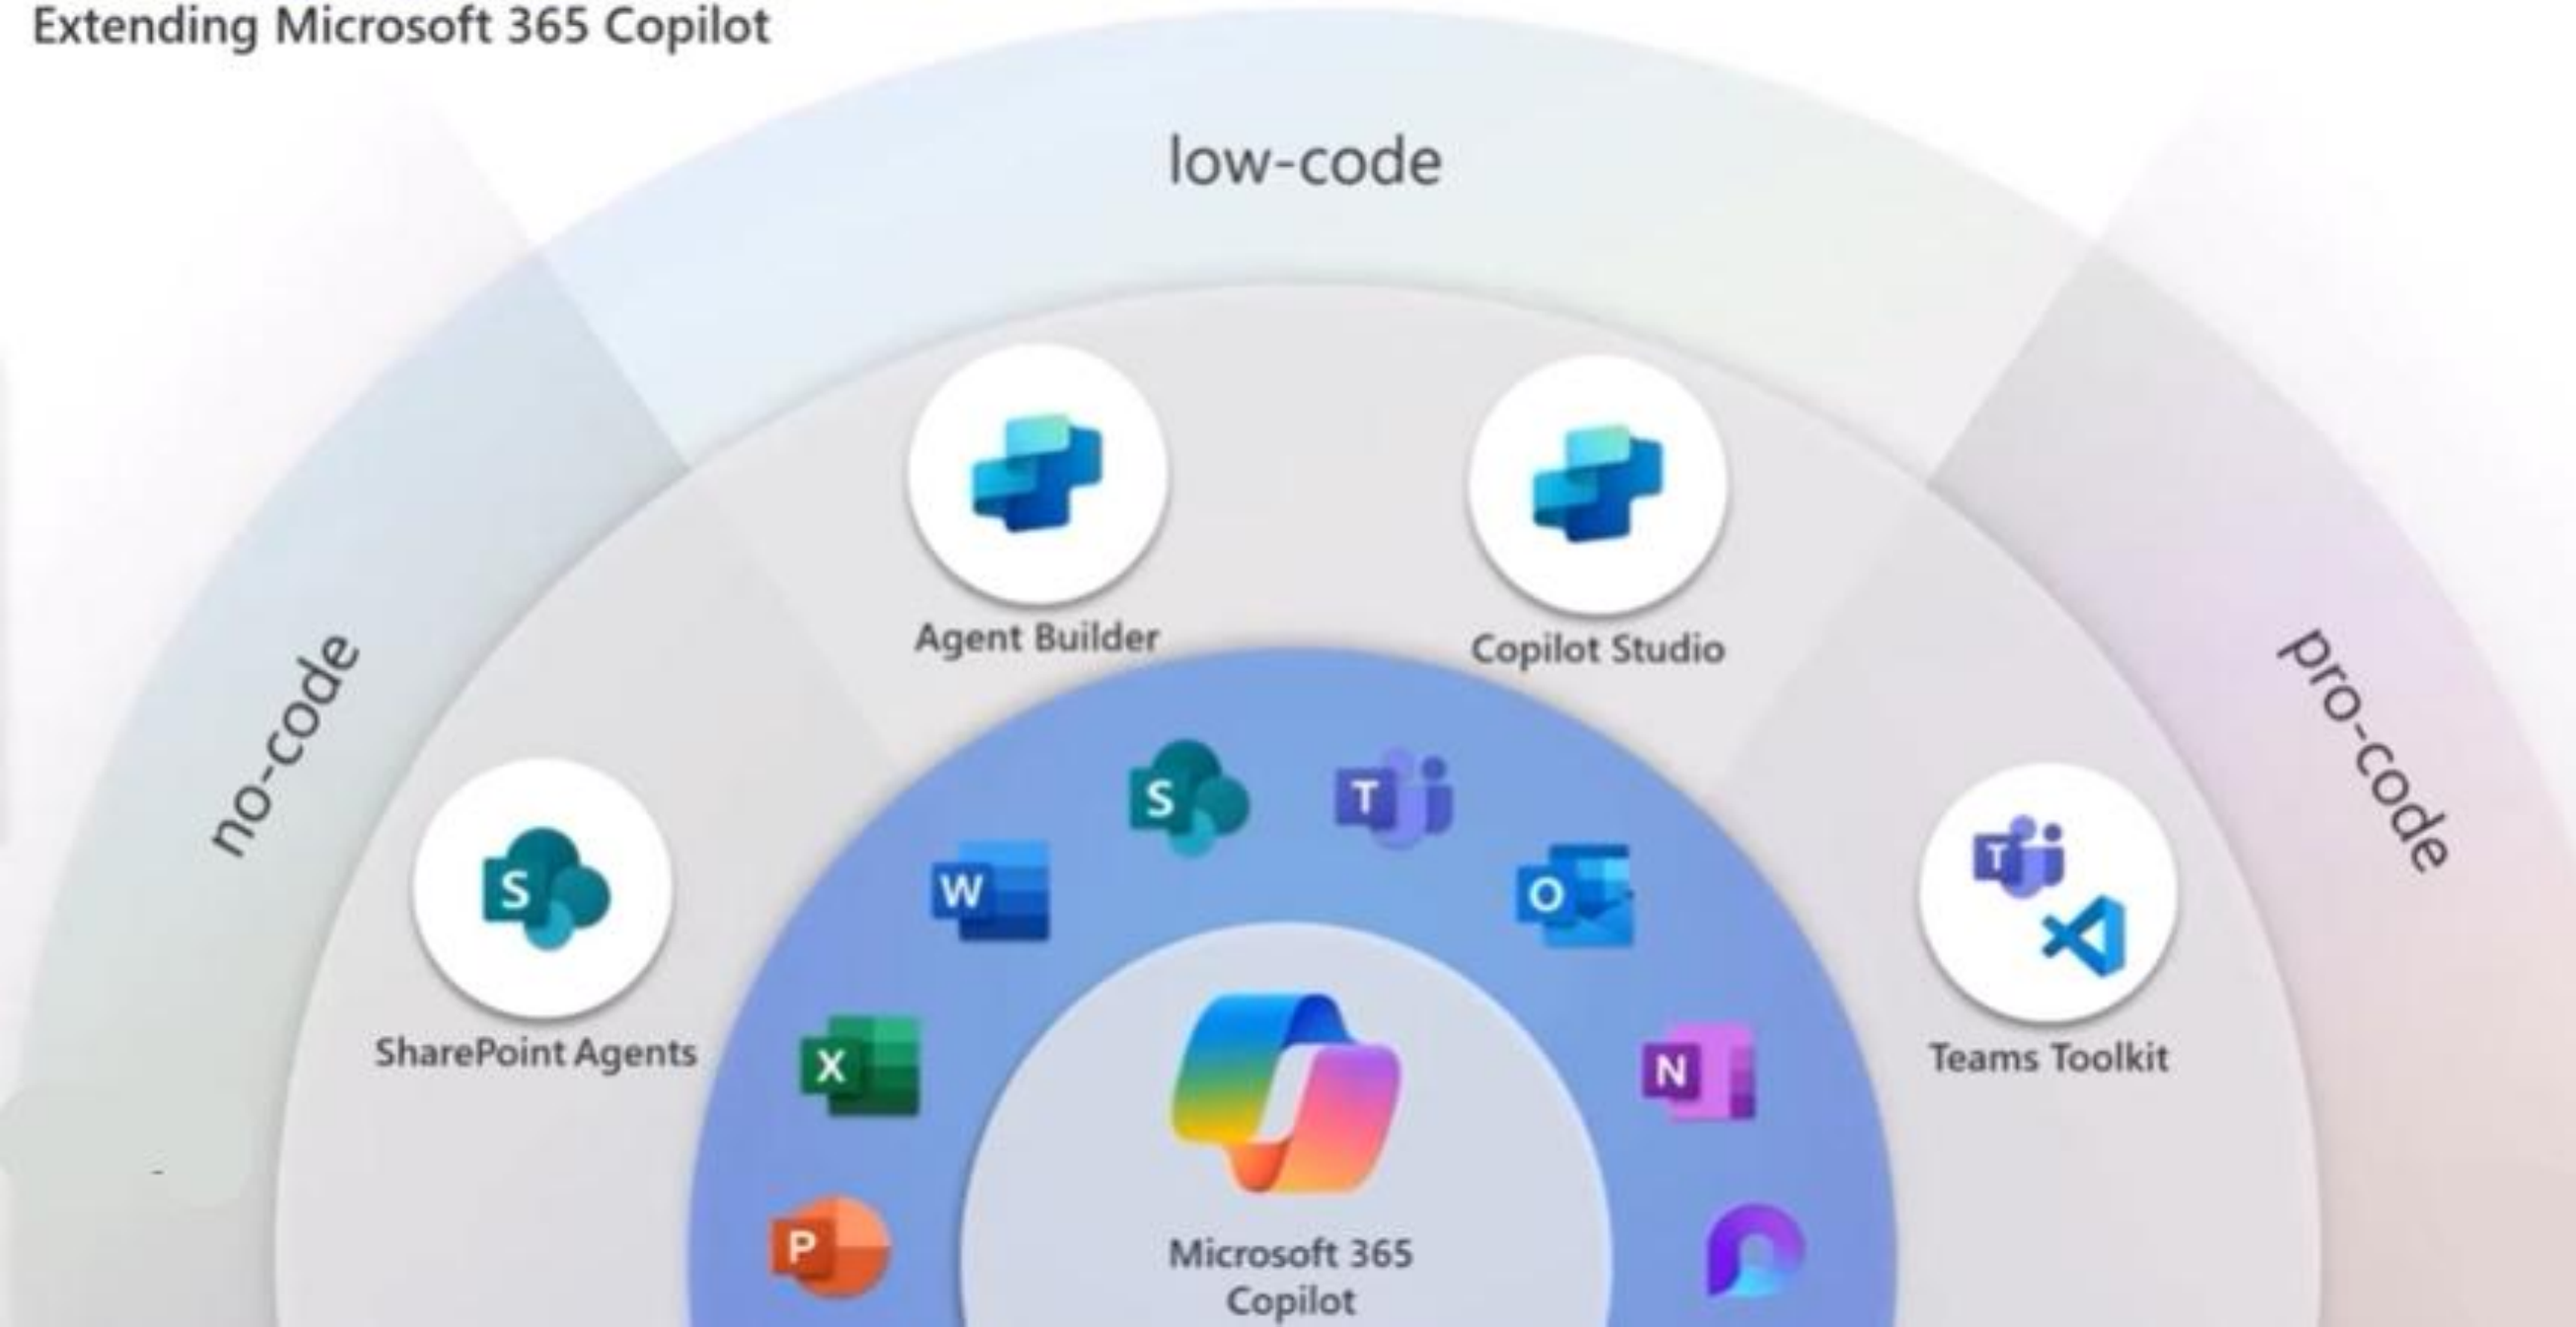
Data

In a nutshell

- Agents provide a focused data set
- Agents provide focused instructions
- Agents can take autonomous actions
- Agents can be programmed in English
- Best practice is many specialised agents not one agent to do it all

Building agents in Microsoft 365

Extending Microsoft 365 Copilot



Prompt Coach

Business Challenge – Improve prompting

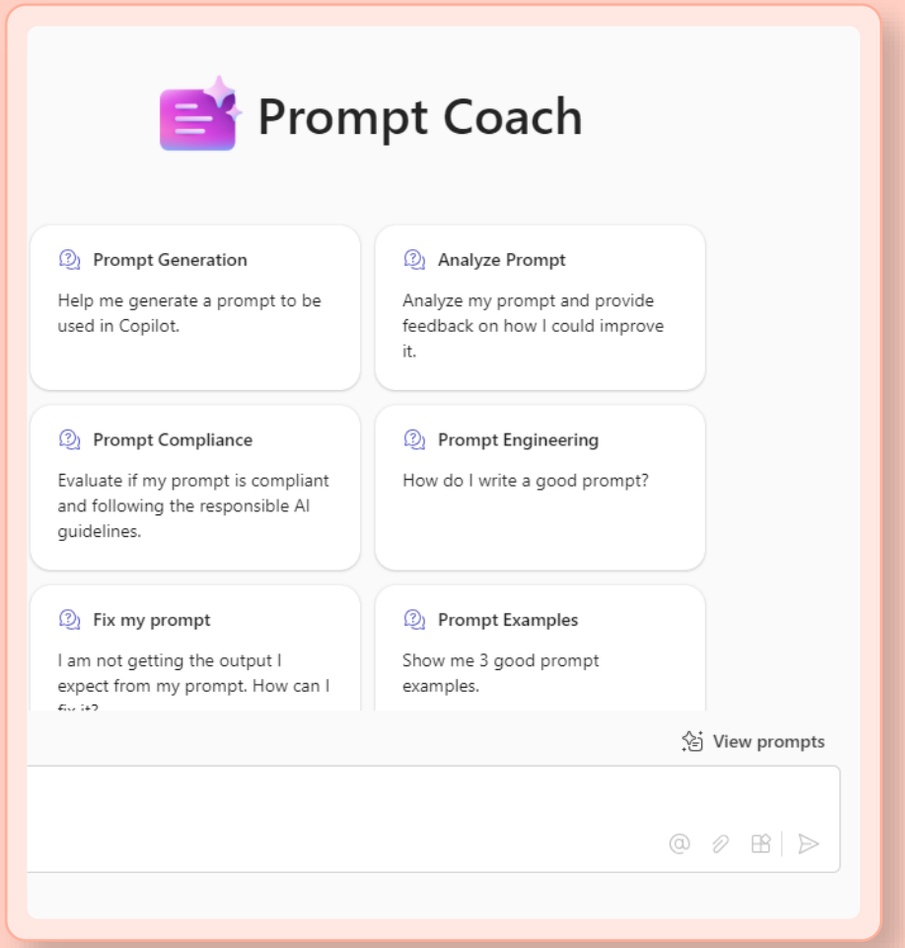
Copilot works best when it gets very detailed prompts that are similar to the instructions you would give to a person. But most people are not used to interacting with a computer that way. Prompt coach can help speed the process of interacting with LLMs

How Prompt Coach can help

- Prompt coach can help to improve the success rate of receiving valuable responses from Copilot. It can also help users get more value from Copilot suggesting use cases

Areas of impact

- Improve Copilot usage
- Speed time to value of Copilot
- Improve business processes



DEMO

Take aways

- Start small
- Break the need down into smaller components first
- Up front planning will save loads of frustration
- Be mindful of security
- Agents can be created by various tools
- Agents are probabilistic not deterministic
