# Vibe coding

## In a nutshell

- Think of it as an assistant not a replacement
- Many, many different options
- Free options are available but paid is better
- Some LLMs are better than other for code
- Things will change
- Trust but verify

*DEMO*

# Take aways

- You can start for free
- Trust but verify
- Start small
- Don't expect it to everything. It needs guidance and correction
- Give it examples to work with
- Use commands and skills to focus AI
