Copilot Cowork

Built for real work

- **Delegate real work, not prompts**—Copilot Cowork takes actions, not just chat. Copilot plans tasks, reasons across tools/files, and keeps work moving over time.
- **Observable and controllable**—transparent actions, reviewable progress, with guardrails to guide or stop execution.
- **Enterprise-ready**—operates within Microsoft security, identity, and governance for confident adoption at scale.
- **Working closely with Anthropic**—to integrate the technology behind Claude Cowork into Microsoft 365 Copilot.

Copilot Cowork will redefine the way work happens

Work today

Today, people have to...

Focus on every task in a project like an individual contributor

Cognitive shift

Juggle apps & systems to complete a workflow

Orchestration shift

Use AI for advice, but take action themselves

Action shift

Work with Copilot Cowork

Now, people will be able to...

Focus on all-up projects and hand-off tasks like a manager

Concentrate on the result while Copilot works across apps & systems

Enable Copilot to autonomously complete tasks, while staying in the loop for big decisions

Microsoft commitments and controls

We secure your data
at rest and in transit

You control your
data

Your data is not used
to train or enrich
foundation models

You're protected
against AI security
and copyright risks

Copilot Cowork is built on trust

Copilot Cowork Scenarios

Customer meeting prep	Preparing for a customer meeting often means pulling context from across email, meetings, and files—and finding time to prepare. Copilot Cowork brings that context together to produce the outputs you need to walk into the room prepared: A briefing document, supporting analysis, a client-ready deck and schedules dedicated prep time on your calendar.
Clean up my inbox	Most weeks start overbooked, with little focus time. Copilot Cowork takes over the triage—reviewing your Outlook calendar, asking what matters, flagging low-value meetings, and proposing changes. With one approval, it updates your schedule, adds focus blocks, and even sends meeting prep.
Launch a product	Product launches move fast, especially as competition shifts. Copilot Cowork turns launch intent into action—building competitive comparisons, sharpening differentiation, and generating a value prop doc and customer pitch deck. It also outlines milestones, owners, and next steps.
Research company financials	Deep research is time-consuming. Copilot Cowork gathers company data across factual sources—SEC filings, earnings, analyst notes, and news—then organizes it with citations. You get a structured research report, a ready-to-use Excel analysis and all of it attached to an executive email summary to your team.

In a nutshell

- Cowork is designed to do things
- Still early days for Cowork
- Includes ability to use 'skills' for tasks
- Workspace resources stored in OneDrive
- Supports, 'set and forget'

DEMO

Copilot Cowork Takeaways

- Goes beyond prompts to plan and execute real work
- Delegates outcomes across files, meetings, chats, and apps
- Supports 'set and forget' for multi-step workflows
- Observable and controllable — you stay in the loop
- Uses 'skills' to extend what Copilot can do
- Enterprise-ready with Microsoft security and governance
